Fundamentals of Leadership

This class takes managers and supervisors on a journey that begins with a discussion of great leaders and the characteristics they demonstrate. This discussion sets the stage for a program that allows participants to identify their own individual style and gain tools and techniques to make their personal strengths most effective.

Human Resource Management Issues

This class identifies and explains key legal issues that a manager may have to address in the workplace today. It helps current and future managers understand their responsibility to recognize and enforce the employment laws that speak to the issues and minimize their chances of ending up in court.

Environment, Health and Safety Essentials

This course provides front-line supervisors with EHS essentials applicable to most operations. Through case studies and examples this core course helps managers become familiar with and manage facility risks, hazards and regulations.

Problem Solving & Decision Making

In today's fast paced business climate, knowing how to solve problems and make decisions efficiently and effectively is crucial. This course will address common strategies and procedures for problem solving and decision making.

Making a Profit in Manufacturing

Through case studies and examples participants will learn how a manufacturer can use financial ratios and other measures of financial performance to monitor its operations, effectively reduce risk, and maximize return.

Best Practices & Continuous Improvement

In this workshop you will learn the concepts of continuous improvement and the methods used to identify and prioritize problem areas. You will use some of the basic tools to benchmark, develop and implement quality and productivity improvements.

Positive Motivation and Discipline

This class combines two topics for an interesting perspective on leadership; employee motivation and discipline. Understanding motivation and building a strong relationship makes coaching conversations more successful.

Effective Business Communication

Business Communication is designed to enhance individual ability to communicate information to others within a company. Course content relates directly to supervisory relationships, customer contact and dealing with managers.
