PROJECT EXPERIENCE

- **AvanGrid – Corporate Safety Training**
New England & New York

Provided corporate safety training to all levels of the company throughout their New England and New York region (approx. 400 employees). The training targeted core safety components for implementing and maximizing an effective safety program. Topics included but not limited to: Orientation, Leadership, Reporting Obligations, Execution and Investigation. This training required much collaboration with company management, corporate safety department leaders and various departments for the development, planning and execution of the training initiative.

- **Kubricky Construction/DA Collins Companies – Health & Safety Training**
Saratoga, NY

Developed and delivered several (10/30hr) OSHA outreach construction classes specifically designed for the heavy highway construction trades. Provided oversight and safety observation for various construction and highway projects to assist their internal safety department.

All experience is from prior roles.

JEFFREY G. MALO, CUSP

Manager, Safety Services

PROJECT EXPERIENCE

- **Dormitory Authority of the State of New York (DASNY) – OSHA Training**

New York City & Albany, NY

OSHA (10-30hr) Outreach Training – Developed and administered training programs throughout New York State to over 150 DASNY project managers. All materials and topics were developed for site-specific awareness with an extensive detail in the roles and responsibilities of DASNY employees on a construction site.

- **General Electric, Energy – Corporate Trainer**

Niskayuna, NY

Corporate environmental, health and safety instructor - Facilitated various General Electric, Energy specific safety and health programs to all global field services and direct hire personnel throughout their representative service regions. Programs were intended to educate the participants on all General Electric corporate safety and health compliance programs, federal regulations and covered various industries.

- **Associated Builders & Contractors – NYS Hazard Abatement, EHS Training**

Albany, NY

Developed and administered site-specific Environmental, Health & Safety training (Construction Industry & General Industry) to participating members throughout New York State. Topics included but not limited to: Excavation, Fall Protection, Electrical Safety, Scaffolding, Haz-Com, Respiratory Protection, CPR/FA.

- **University at Albany, CESTM, Nano Technology – HAZWOPER Training**

Albany, NY

Developed and facilitated training for over 250 emergency response personnel to the (24hr) Hazwoper, technician level. Assured all certified students retained the needed knowledge to perform emergency response duties safely and compliant to company corporate safety policies and procedures. Currently provides (8hr) annual refresher emergency response training on-site with extensive practical evolutions (hands-on) incorporated within training sessions to cover industry chemicals and processes.

All experience is from prior roles.
